

i-Vu 6.0

Controllers that support Automatic Graphics as part of CCN Discovery

If the Major Version of your equipment/controller is higher than what is shown in the list below yet it still does auto-instantiate, we strongly recommend that the resulting View and the Network Points list be inspected to insure that all points are properly mapped. Should any of the points not be mapped properly (they will be RED in the Network Points list, and their associated View objects may not appear properly), then the Equipment & View files will need to be edited using SNAP and ViewBuilder

If the equipment/controller version that you have is not on the list then it will be necessary to use SNAP and ViewBuilder to create your own representation for that equipment. Refer to the User Guide for SNAP and ViewBuilder and the I&S Guide for i-Vu 6.0 for further information

	Controller	Description	PIC Type	Major Version	i-Vu 6.0 SAL Library Release Dated	Notes	
Zoning	3V Zone Controller	Zone Controller	044ZC	1	20150128		
	3V Bypass Controller	Bypass Controller	044BC	1	20150128
