**Model Family:** SYSTXCC

## Carrier Introduces The New White Infinity® System Control

We are excited to introduce the new White Infinity® System Control (SYSTXCCWIC01-B) to our communicating systems control lineup. This control will have all the same great features, functions and aesthetics as the current Black System Control, such as Wi-Fi® and Bluetooth® radio, occupancy sensing, full Infinity® equipment control, zoning and data collection through our CÔrConnect™ Home Diagnostic Portal. It works the same with all Infinity products and the MyInfinity mobile app.

This new model will give you the opportunity to supply your homeowner with this version for homes requiring a lighter design palette while still providing our premium communicating equipment system control.

Key introduction dates are as follows:

Pricing Release	February 28, 2019
Pre-Sale Literature	
Installation and Owner's Guides	
First Orders	
Consumer Literature	April 8, 2019
First Shipment (week of)	First of June 2019*

\*U.S. only. Expected to be available in Canada later this year with French/English literature and packaging.
